MAY CHANGE HER CAPITAL

Florida Considering the Question of Removing It From Tallahassee.

Jacksonville, St. Augustine, Ocala and Gainesville All Hope to Capture the Honor-White Democratic Voters to Decide on November 6.

TALLAHASSEE, Fla., Aug. 4.-The only Ladies' Gauze Vests, high neck, with short sleeves. Were 25c. State issue dividing the people of Florida in the political campaign of this year is: Shall the State capital be removed from Tallahassee? If so, to what place? This question is to be practically settled

by the white Democratic voters in a primary election to be held November 6 next Ladies' extra size Vests, in It has been placed squarely before them for decision by the insertion in the platform adopted by the recent Democratic State Convention, held in Jacksonville, of the following plank: "The question of the removal of the seat of State government and as to the holding of a constitutional convention should be settled by the white Democratic electors of the State at a primary election to be held at the time of 1900, to be participated in by only white Democrats who, in said general election, shall have voted for the candidates of this

onvention.' The constitution of Florida provides that "The constitution of Fforma provides that "The seat of government shall be at the city of Tallahassee, in the county of Leon." Tallahassee was established as the capital of the Territory of Florida in 1823, two years after the purchase of the territory from Spain, the location having been chostally the control of the co

from Spain, the location having been chosen by a commission appointed by President Monroe for that purpose, consisting of Dr. W. H. Simmons and John L. Williams.

Tallahassee has remained uninterruptedly the capital of Florida, notwithstanding abortive efforts have been made from time to time since 1849 to remove the capital to more acceptable town. The present move Boys' Balbriggan Shirts and brawers, with high neck, long or hort sleeves, drawers ankle or nee length. Were 25c. Clear-

to come.

The contest is entirely within the lines of the Democratic party, and only white Democrats will be allowed to participate. The Democrats are in absolute control of Florida and their platform continues as

follows:
"In the event that a place other than In the event that a place other than Tallahassee shall have received a plurality of the votes cast for the location of the seat of State government it shall be the duty of the State Legislature to provide for the submission to the electors of a constitutional amendment providing for the change of location to that place chosen at said primary election, and it shall be the said primary election, and it shall be the duty of all Democrats to vote for such con-stitutional amendment. If Tallahassee shall receive the plurality vote, then the Legislature shall there provide better and safer accommodations for the State's rec-

ords and business." Thus has the Democratic State Convention, establishing a precedent heretofore unknown in Florida, sought to dictate positively and directly the action of both the Legislature, which is sure to be over-Legislature, which is sure to be over-whelmingly Democratic, and also of the Democratic voters of the State, in the event that the white Democrats give some other town than Tallahassee a plurality of their votes at the November primary. This would, in effect, shut out all Repub and colored Democratic voters from any voice in the location of the State capital. As seen, the constitution must be amend-ed before the capital can be removed from Tallahassee. concerning amendments, that such amend-ments, proposed in either house of the Legislature, shall require for adoption the votes of three-fifths of all the members

votes of three-fifths of all the members elected to each house, shall be entered upon the journals, published in one newspaper in each county for three months immediately preceding the next general election, and submitted for approval or rejection by the voters.

The primary will be held November 6. If a plurality of the white Democratic electors vote for removal to a place other than Tallahassee the necessary constitutional amendment will be proposed at the session of the Legislature to meet next April, and, if it is adopted by a three-fifths vote in each house, will be submitted to the people at the general election in November, 1902. If a majority of the electors voting upon such amendment favor its adoption it will become a part of the constitution, to take effect as of the day of its adoption.

The cities entered as candidates for the location of the capital are Tallahassee.

The cities entered as candidates for the location of the capital are Tallahassee, Jacksonville, St. Augustine, Ocala, and Gainesville. With the exception of Talla-Gainesville. With the exception of Talla-hassee all of these towns are in the Second or East Fiorida Congressional district. All of them have formed active associations, composed of their strongest men, to work for the capital, and the whole State is be-ing flooded with literature and oratory set-ting forth the advantages of the several

ing forth the advantages of the several

spirants.

The several towns striving to displace Tallahassaee as the State's capital are each urging as the main grounds for their seection that they are more modern and progressive than Tallahassee, nearer the centre of the State's population, more accessible by transportation lines and that Florida needs a larger and finer Statehouse to accommodate her officials and show to her accommodate her officials and show to her winter visitors. There are many indications, however, that the whole question will resolve itself into one as to whether at this time the taxpayers of Florida are able and ready to bear the additional burden of taxation which would have to be imposed on them in order to remove the seat of government and erect a handso seat of government and erect a handsome million-dollar capitol, as is proposed.

It has been ascertained by direct enquiry that the present Statehouse is large enough and sufficiently protected for all the needs of every branch of the State government. It is an old building, but one of the most substantial in the State. Tallahassee enjuys advantage of granian hassee enjoys advantages of superior healthfulness and cheapness of living. It is widely believed, too, that the incidental expenses of running the State government, were present removal plans carried through, would be multiplied over present

That portion of the State west of the Suwanee River is said to be practically solid against capital removal. A large number of people in eastern and peninsular Florida, however, desire the capital in their section. A majority of Florida's population is east and south of the Suwanee, but many of them are said to be against capital removal at this time, on account of the expense involved. Especially are the fruitgrowers, who have suffered so severely in the last half dozen years from killing freezes, opposed to this movement until they are able to recoup the losses which they have had to be seen the second they have had to be seen they had to be seen they have had to be seen they have had to be seen they had to be seen they have had to be seen they have had to be seen they had to be seen they had to be seen they have had to be seen they had to be seen the

Another obstacle in the way of capital removal is that unless the constitutional provision relative to the issuance of State bonds is amended there is no way to raise the necessary money except by direct taxation, and this would require such a large extra levy that it is thought to be entirely impracticable. Section 6 of Article IX of the State Constitution, provides that "the Legislature shall have power to provide for issuing State bonds only for the purpose of repelling invasion or suppressing insurrection, or for the purpose of redeeming or refunding bonds already issued at a lower rate of interest." The taxpayers of the State are understood to be strongly opposed to changing or weakening this safeguard against the increase of the State's souded debt, which is now a little more than \$1,000,000. than \$1,000,000.

LAUREL'S WATER SUPPLY.

Town Soon to Have Works of 100,-000 Gallons Capacity.

LAUREL, Md., Aug. 4.—The water board has about determined upon the general plan to be pursued in constructing the system of waterworks for Laurel, and has also decided to purchase the plant of the Laurel Electric Company for the town. The plan for the waterworks provides

for the drawing of the water from the springs on the property of Mr. Luther Brashears, located two miles from here. Change Will Increase State Taxes. The capacity of the springs, according to the engineer's measurement, is 360,000 gallons every twenty-four hours, or more than three times the amount required. The water will be drawn to a reservoir and forced into a standpipe to be erected between the residence of Mayor Phelps and Ivy Hill Cemetery, in the western portion of Laurel. The standpipe, which will probably be 100 feet high will have a capacity of 100,000 gailons. 100,000 gallons.

The price set for the purchase of the electric light plant is \$9.600. The plant is now owned and operated by a private company composed entirely of citizens of the town. The plant was built in 1893, at a cost of \$13,134.76, by private capital subscribed by a number of Laurel citizens, including ex-Senator Gorman, but was sold in 1895 to the present owners, since which time \$2,202.22 has been spent in repairs and betterments. The plant is at present capitalized at \$10,000 and has paid 6 per cent regularly on this capitalization. The engineers, at the request of the board, figured upon the cost of constructing a similar plant to the one now here at the pres.

The Mayor and City Council of Laurel were authorized by the last Legislature to issue bonds to the amount of \$45,000 to put is we benus to the amount of \$45,000 to put in waterworks and purchase an electric plant. Thirty-five thousand dollars was the limit for the waterworks, while \$10,-060 was the amount set aside for the pur-chase of the electric light plant. The bonds are 40-year gold bonds and bear 4 per cent interest.

KILLED WHILE TAKING TRAIN. Fatal Accident to Unknown Man at

CUMBERLAND, Md., Aug. 4.—A man aged about thirty years, who talked with broken accent and was either a Swede or a German, was ground to pieces under a Baltimore and Ohio train which he attempted to board at the Baltimore Street crossing in Cumberland yesterday afternoon. He slipped, and being caught by the brake beam, was dragged two squares. His body was frightfully mutilated, and he lived only a few moments. He came here from Baltimore this week, and told employes at the Queen City Hotel, where he did odd tobs, that he was en route to Chicago, but did not give his name. A letter with the add through the man killed was some other person.

PANIC AT A BROOKLYN FIRE.

Big Frame House Gutted, But No One Injured.

NEW YORK, Aug. 4.—A panic followed the discovery of fire on the second floor of the three-story frame dwelling, No. 130 Sheffield Street, Brooklyn, this morning, and occupants of the house rushed wildly into the street, half clad.

The flames were not extinguished until after ythey had spread to the house at No. 132, and the firemen had a hard struggle to put it out.

The women and children were so thoroughly frightened that it was some time of the cost that can be being cost in the interior of Pennsylvania and aged about thirty years, whe talked with that it needs no argument. It only awaits the development of the ore fields to fit the west Indies and Nova Scotia. The recently-discovered enormous development of the ore fields to fit the west Indies and Nova Scotia. The recently-discovered enormous development of the ore fields to fit the west Indies and Nova Scotia. The weep on the street with the attempted to board the west indies and Creampted the west side of the Chesapeake, both in the interior of Pennsylvania and the best of the Coast will find interchange of coke and ore between Northumberland Straits and Chesapeake Bay.

Demand for the American Product Steadily Increasing.

hesapeake Bay Cities to Profit Most From the New Market-Baltimore, Norfolk, Newport News, and Lower Harbors Will Have a Great Trade. The Mines of West Virginia.

Recent reports from Southern and M'ddle Atlantic seaboard cities show that there is a growing demand in Europe for American coal and coke. It is evident that it will fall to Southern States, with their great coal fields, to supply much of

lured upon the cost of constructing a similar plant to the one now here at the present time, and the estimate furnished was \$14.746. The present value of the existing plant, as figured by the engineers, is \$13.766. The board determined to purchase the plant, so that it could be operated hereafter by the city. The town is at present paying the Laurel Electric Light Company \$1,200 annually for lighting streets.

steadily-growing European demand for American coal and coke is as certain as any future event can be./ But the growth in domestic consumption of coal and coke along the coast and concentrating on Chesapeake ports will be even greater.

"It is in the hands of the iron men around the Chesapeake and others who will follow them there to control the normous export trade in steel rails that er cent interest.

KILLED WHILE TAKING TRAIN.

Can, and South American railway construction, because, for export, they can put their product on board vessels at a lower cost than can be done by the great works of Pittsburg, Cleveland, Chicago, or in the interior of Pennsylvania.

and the best smelting coke in the world, and at a cost below that at which these great staples can be elsewhere assembled. That is an indisputable fact, and one that can't be gotten over, and which will not

will distance Illinois, now next to Pennsyl-

The writer justly believes that the Tennessee and Alabama fields will be able to take care of themselves. Their development points to conditions on the Gulf somewhat similar to those promised for the Chesapeake ports. When it is remembered that the demand for industrial fuel is steadily on the increase, that much of it for many years must be supplied by the South, and that the uncovering of such resources there has not begun to affect their strength to an appreciable extent, the part to be played by the South in the world's industrial history may be compre-

MAYOR DEPRIEST'S SLAYERS.

Hot Chase for the Men Who Killed the Culloden Executive. HUNTINGTON, W. Va., Aug. 4.-John

Depriest, Mayor of Culloden, was murdered while assisting in raiding a speakeasy in have a new hotel, costing in the neighbor- that town early in July. His murderers were Lee Higanbotham and Monroe Tinssumed definite proportions since President ley, and it now looks as though they will soon be captured. A reward for their arrest has been offered, and relatives of the murdered man are here from Lawrence county. Ohio, assisting in locating the slayers of the young mayor.

Last night a searching party came upor both Higanbotham and Tinsley in the mountains near the Cabell-Lincoln county line, only a few miles away from the scene of the tragedy. It is alleged that on Tuesday night Higanbotham visited his family in Culloden and departed for the mountains a few hours before daybreak garbed in a woman's attire, even to a sun-bonnet. This led to a party being formed yesterday which went in pursuit, and last night they came upon the murderers at the point above stated. Higambotham and Tinsley had, no doubt, been at this point in the mountains ever since the tragedy, for here were discovered cooking utensils and pro-

makers. fitters, laborers, and locomotive painters are out from Lake Superior to the Pacific Coast. In Winnipeg, including the men dismissed on Monday 550 are out.

The men claim the dismissals last week were an attempt on the part of the Canadian Pacific Railway to break up their unions, and hence the strike. The men also say they wanted to draw up a new schedule, but the railway company refused transportation to the delegation. It is hinted among the men that it may become sympathetic and extend over the entire service, including engineers and firemen.

THE WEST VIRGINIA CROPS.

Conditions Throughout the State Now Much Improved.

CHARLESTON, W. Va., Aug. 4.-The secretary of the Board of Agriculture has just made his monthly crop report. It is somewhat late. The crop conditions over most of the State are brighter at present than at any time during the past four weeks.

These conditions are the result of the rainfall that/was more or less general the 19th and 20th of July. For some time pre-vious some sections were suffering from drought. From recent reports frequent and heavy rains have prevailed in the ex-treme northern and western parts of the State, rendering harvesting difficult, and onsiderable damage has been done by landwashing.

The potato crop is well advanted and a good yield may be expected. Cora s generally reported as doing well, and millet s making a fine growth. The oat and hay harvest is negging com-pletion, and the former is maying a fair yield, while the latter will fall slow last year's crop. What wheat has been harrested was generally well filled and is pro-

ducing a fair yield.

With few exceptions, apples are dropping off badly and are very defective. The most favorable reports come from sections where apple growing is made a business, and where care and attention have been bestowed.

BURKE JACKSON ARRESTED.

ing New Orleans Race Riots. NEW ORLEANS, Aug. 4 .- Burke Jackon, who occupied the room in the Jackson House, where the negro desperado Charles was killed, was brought here yesterday from Magnolia, Miss. The negro, who was killed at the time of Charles death was supposed to be Burke Jackson, and was buried under that name. The po-lice have not the slightest idea who the dead negro was. Burke Jackson fled from the city the very day of the riot, but was captured at his old home, Magnolia. He can tell all that went on in the house, can't be gotten over, and which will not be much longer overlooked. The reaction now going on in the iron and steel trade is already calling very marked attention to it.

"The development of the coal interests of West Virginia has proceeded steadily, until the State is coming into second place, and will soon not only be ahead of but will distance Illinois pay part to Papagari.

Nixon, and his wife trene. They were in the Jackson House at the time of the Nixon, and his wife Irene. They were in the Jackson House at the time of the

where they were arrested today, and brought back to New Orleans. At a conference of the colored ministers representing all the Protestart denomiattempting to create race antagonism, and thanking the mayor and the citizen police for the protection given the negroes during the riots.

HOYT WILL HAVE A GUARDIAN. Prostrated Playwright to Apply to

the Court Tomorrow. CHARLESTOWN, N. H., Aug. 4 .-Charles H. Hoyt, the playwright, whose ommitment to a retreat in Hartford, Conn., was revoked by Judge Freeman las Tuesday, will tomorrow apply to Judge

Tenney for the appointment of a business agent or guardian.

It is probable that he will suggest the name of James O. Lyford, of Concord, N. H., for the position.

WILL TEST "JIM CROW" LAW. White Officer With Negro Prisoner

Refuses to Obey It. RICHMOND, Va., Aug. 4.—The validity of the new "Jim Crow" law, which went into operation on July 1 last, is to be tested before the Supreme Court. A case has just occurred which will cause a test to be made of the new law. It remains to be seen, however, whether it will involve the full merits of the statute, or only essential points

The case grows out of a request of Conductor Bailey, of the Peninsula division of the Chesapeake and Ohio Road, to permit Guard L. W. Baker, of the penitentiary force, to carry a colored prisoner in the white car on his train. Baker refused to go into the car set apart for negroes, as is proyided by the new law. Then the law was produced by the conductor, and he assigned the prisoner to a seat in the "colored" car. The guard refused to go, saying that he was acting under instructions, and Conductor Balley requested him to leave the train, which he did at Newport News, and the train came on to Richmond, leav-ing the guard and his prisoner.

The railroad company intends to make a test of it, being confident that under the law it is intended that the negro prisoners shall ride in the "colored" coaches. They say the whole intent of the law was to compel the negroes to occupy a separate compariment, and that to permit them in ther coaches would both be a violation of he letter and spirit of the law. This is the section under which the officer relied for his course: "Be it further enacted that the provisions of this act shall not apply employes on railroads or persons emoloyed as nurses, or officers in charge of

The Pamunkey Indians are also giving the Southern Road some trouble. They declare that it is a shame to humiliate a race from whom some of the aristocratic families in Virginia have sprung by forcin them into a car with negroes. The chief of the Pamunkeys does not understand this logic, heasays.
